# Introduction

The TTI Talent Insights® Team Report is designed to increase the understanding of the team's makeup. The report provides insight into two distinct areas, behaviors and driving forces. Revealing a team's potential by identifying strengths and weaknesses will lead to personal and professional development and a higher level of productivity.

## Behaviors

This section of the report is designed to help reveal how individual behaviors influence the team dynamic. The ability to interact effectively with other team members is key to a team's success, and this report reveals each individual's behavioral style within the team framework.

## Driving Forces

This section of the report provides the why behind a team's actions. Understanding the dynamics of the drivers within the team, why they do what they do, reveals energizers, stressors and more about the team and its members.

## Behaviors and Driving Forces Summary

This section is a visual representation of the team from a behavioral and driving forces standpoint ordered into primary, situational and indifferent clusters.

# Introduction

## Behaviors

*Predictable patterns of human nature can be accurately measured through behavioral assessments. A clear understanding of these predictable behaviors can enable productive outcomes. When individual behavioral scores are compiled to examine members of a team, managers are able to see areas of strength, pursue improvement opportunities, and secure the resources needed to deliver on organizational goals.*

### CONTENTS OF THE REPORT

- Overview - A summary examining the composition of your team for both DISC and behavioral segmentation expressed as a percentage.
- Team Composition - Defines the makeup of your organization by behavioral segment and shares the DISC graphs of individuals on your team.
- Behavioral Segment Analysis - Examines the individuals within each segment, segment characteristics, ways to communicate, and ideal environment.
- Group Wheel Plots - Identifies the natural, adapted, and migrated styles of each team member.
- Behavioral Style Comparison - Compares individual scores to others on the team, team averages, and population means.

# Team DISC Overview

The TTI Success Insights® wheel is a graphic representation of a team's behavioral make-up among the four quadrants of the DISC wheel.

## OBSERVING DISC

Have you ever noticed:

- Some people are forceful, direct, and results-oriented
- Some are optimistic, fun, and talkative
- Some are steady, patient, and relaxed
- Some are precise, accurate, and detail-oriented

## DEFINING DISC

### Dominance

How you respond to problems and challenges

### Influence

How you influence others to your point of view

### Steadiness

How you respond to the pace of the environment

### Compliance

How you respond to rules and procedures

# The TTI Success Insights® Wheel

The wheel illustrates the blending of the four DISC styles, while demonstrating the similarities and differences in behavioral styles among the team members. This wheel shows the behavioral composition of a team, represented as percentages in each of the eight segments.

# Behavioral Hierarchy Defined

*Twelve behavioral factors that are critical to team success are measured in this assessment. Comprehending each phrase and its definition drives a common language that will enable you to compare individual scores, the team average, and the population means on subsequent pages.*

**Analysis** - Compile, confirm and organize information.

**Competitive** - Want to win or gain an advantage.

**Consistent** - Perform predictably in repetitive situations.

**Customer-Oriented** - Identify and fulfill customer expectations.

**Persistence** - Finish tasks despite challenges or resistance.

**Following Policy** - Adhere to rules, regulations, or existing methods.

**Frequent Change** - Rapidly shift between tasks.

**Interaction** - Frequently engage and communicate with others.

**Organized Workplace** - Establish and maintain specific order in daily activities.

**People-Oriented** - Build rapport with a wide range of individuals.

**Urgency** - Take immediate action.

**Versatile** - Adapt to various situations with ease.

# The Bell Curve Defined

*Understanding how to read a bell curve and standard deviation will enable you to clearly analyze the composition of your team.*

The bell curve, known as a normal distribution, is the most common type of distribution for a population. The highest point on the curve, represents the highest population of people, or the mean of the group. The standard deviation is a number used to show how data is spread out from the mean, representing a percentage of the total data collected.

For example, if the assessment scores of 100 people are collected and used in a normal probability distribution, 68 people, representing 68% of the 100 assessment scores, should fall within one standard deviation of the mean. Thirty four percent will be one standard deviation above the mean and 34% will be one standard deviation below the mean. The remaining 32% of people will be two or more standard deviations away from the mean. Sixteen percent will be two or more standard deviations above the mean and 16% will be two or more standard deviations below the mean.

# Team Driving Forces Overview

## Observing Driving Forces

Have you ever noticed some people:

- Seek knowledge relevant and useful to their current situation
- Seek to expand their understanding and knowledge in all endeavors
- Tend to be unrestrained in the application of resources
- Tend to utilize and apply their resources to maximize return
- Seek function in their surroundings
- Seek to fully experience their surroundings
- Tend to be selective in who they help and serve
- Tend to serve, help and eliminate the suffering of others indiscriminately
- Seek to share power, recognition and control
- Seek to be recognized and control their own destiny
- Tend to remain open and flexible in their methodologies and approach to life
- Tend to live within defined systems and traditional approaches

Segment breakdown of each team member's #1 Driving Force

# Driving Forces Defined

**Instinctive** - People who are driven by utilizing past experiences, intuition and seeking specific knowledge when necessary.

**Knowledge**

**Intellectual** - People who are driven by opportunities to learn, acquire knowledge and the discovery of truth.

**Selfless** - People who are driven by completing tasks for the sake of completion, with little expectation of personal return.

**Utility**

**Resourceful** - People who are driven by practical results, maximizing both efficiency and returns for their investments of time, talent, energy and resources.

**Objective** - People who are driven by the functionality and objectivity of their surroundings.

**Surroundings**

**Harmonious** - People who are driven by the experience, subjective viewpoints and balance in their surroundings.

**Intentional** - People who are driven to assist others for a specific purpose, not just for the sake of being helpful or supportive.

**Others**

**Altruistic** - People who are driven to assist others for the satisfaction of being helpful or supportive.

**Collaborative** - People who are driven by being in a supporting role and contributing with little need for individual recognition.

**Power**

**Commanding** - People who are driven by status, recognition and control over personal freedom.

**Receptive** - People who are driven by new ideas, methods and opportunities that fall outside a defined system for living.

**Methodologies**

**Structured** - People who are driven by traditional approaches, proven methods and a defined system for living.

# Intentional Team Characteristics

The following information will give team members a clear understanding and appreciation of team members with Intentional as their number one driving force.

# Selfless Team Characteristics

The following information may be characteristics that are missing or could benefit the current team.

## Strengths and Weaknesses

### Potential Strengths

- Willing to participate without consideration for personal circumstance
- Focus on the completion of a task rather than efficiency
- Provide assistance and resources with minimal expectation of personal return
- Define value or success by what comes out of a situation not what is put in
- Accomplish tasks simply for the sake of accomplishment

### Potential Weaknesses

- Tend to have casual approach to how performance is measured
- May value completion of the tasks over time, resources, or talent limitations
- May view activity as productivity
- Can potentially waste resources

# The Bell Curve Defined

*Understanding how to read a bell curve and standard deviation will enable you to clearly analyze the composition of your team.*

The bell curve, known as a normal distribution, is the most common type of distribution for a population. The highest point on the curve, represents the highest population of people, or the mean of the group. The standard deviation is a number used to show how data is spread out from the mean, representing a percentage of the total data collected.

For example, if the assessment scores of 100 people are collected and used in a normal probability distribution, 68 people, representing 68% of the 100 assessment scores, should fall within one standard deviation of the mean. Thirty four percent will be one standard deviation above the mean and 34% will be one standard deviation below the mean. The remaining 32% of people will be two or more standard deviations away from the mean. Sixteen percent will be two or more standard deviations above the mean and 16% will be two or more standard deviations below the mean.

# Behaviors and Driving Forces Summary

Behaviors and Driving Forces can be grouped into clusters, falling into one of three categories: primary, situational, and indifferent. Primary clusters best identify how and why a person will do what they do the majority of the time. Situational clusters show how a person may react in certain situations. Indifferent clusters highlight areas where a person may be uninterested or needing to adapt to a given situation. Using these clusters in a team setting can identify strengths and weaknesses within the team and may highlight opportunities or a missing component of the team.
